

# PROTEGUS PLATFORM

## Every existing alarm system can be smart

An attractive business model

An additional service to the end users

Upgrade every existing alarm system

Control automation devices remotely

Use the monitoring Protegus platform in the cloud

EVERY EXISTING  
ALARM SYSTEM

PROTEGUS APP &  
WEB SELF-SERVICE

TRIKDIS GSM communicator

### FUNCTIONALITY:

- Monitor the security system. The app displays system status and push notifications about each event.
- Control automation devices remotely.
- Call Security Company.

PROTEGUS system can be integrated with any existing intrusion or fire alarm system. Using TRIKDIS GSM Communicator with many popular brands (**Paradox**, **DSC**, **GE Interlogix/Caddx**). There is no need to re-configure the panel. **This allows to upgrade old alarm system in minutes with minimal technical knowledge.**

PROTEGUS Web Self-Service integrates with any ARC system. Security companies can have their own personalized design.
